**Front-End Languages / Frameworks:** SASS, LESS, CSS, HTML, jQuery, JavaScript, ReactJS, GraphQL, Nuxt 3, Vue 2/3

**Back-End Languages / Frameworks:** PHP, Twig, Node.JS, Swift, Laravel

**Software:** Adobe Creative Suite, Microsoft Office, Wordpress, CraftCMS, Strapi, Git, Docker, Google Analytics, Google Tag Manager, Google Data Studio, Figma, Stripe

**Other:** Project Management, product management, accessible design, ADA compliance, client relations, project estimating, scope writing, CI/CD, deployment, web administration, responsive design

## EXPERIENCE

**YoCi Development** - Founder, York, PA

2023 - Present

- Create and manage WordPress custom themes using theme.json, PHP, and Gutenberg, utilizing FSE principles.
- Create and maintain Nuxt 3 boilerplate to rapidly deploy new sites on headless architectures such as Strapi and CraftCMS.
  - Leverage external REST APIs to create dynamic content.
  - Utilize Nuxt 3 Image to increase site speed by more than 70% by converting to webp format to improve UX.
  - Utilize Nuxt 3 SSR to make server-side API calls and improve SEO performance.
- Deploy client sites on VPS systems and utilize CI/CD techniques to ensure continuous, zero-downtime updates.
- Oversee client relationships from initial intake to project completion, including budgeting, scoping, proposal development, and continuous milestone communication, ensuring effective project management and client satisfaction.

**Steadfast Design Firm** - Full-Stack Developer, Wake Forest, NC

2023 - Present

- Enhancing accessibility scan scores by over 50% through the implementation of modern accessibility methods in Twig template files using HTML5 and WCAG 2.1 standards.
- Implementing reusable VueJS components by leveraging existing UI packages and abstracting to fit internal spec.
- Creating and maintaining Nuxt 3 starter for CraftCMS headless architecture using GraphQL and SSR.
- Collaborating with cross functional teams to build and deploy multiple sites across various CMS platforms including WordPress, CraftCMS, and Shopify.
- Developed and optimized Algolia indexing for CraftCMS sites using PHP, and integrated Algolia search results with VueJS components to enhance search speed by 30% and improve UX.

**JPL Creative** - Full-Stack Developer, Harrisburg, PA

2020 - 2023

- Improved site speed performance by more than 60% by optimizing images, leveraging browser caching, lazyloading CDNs, minifying CSS, JS and HTML files.
- Built a custom WordPress plugin that allows users to build their own 2D tours using React.JS, LeafletJS, and Gutenberg blocks.
- Custom PHP logic was implemented in WordPress to dynamically manage event visibility based on datetime, increasing UX by automatically archiving previous events.

**Ameritech Media** - Front-End Developer, Harrisburg, PA

2018 - 2020

- Designed and built customer registration and account administration flow using Bootstrap 5 and AngularJS.
- Designed and built front-end for a legacy app used by more than 3,000+ users, improving UX and reduced support requests by 30%.
- Updated hybrid mobile app by updating UI/UX of the entire user experience to increase user engagement by 50%
